

Letter to the Editor;

The night Mr. Akin put forth the resolution to move the call to the public to the end of the council meeting was a perfect example of why this council should be recalled and replaced. In Mr. Akins' letter to the editor he stated the law that gave him the authority to make this change, however he didn't mention the unanimous objection to this move by the people present. A former Mayor, representatives of two of the town's newspapers and various citizens spoke up that evening objecting to this resolution. The audience voiced their support to these objections by their applause for these speakers.

Mr. Huntley spoke that night in support of the resolution stating that people should not be allowed to interrupt the council while they are doing the "**towns business**". The council doesn't seem to get it that they are elected to do the "**peoples' business**" and that if the people don't agree to what is being done in their name then they have the right and the obligation to speak up and take action.

When the council came to the meeting that night it was obvious that the decision to pass this resolution had already been made in some back room deal and that no matter what public objections the resolution would be passed. This was just another example of the council not really representing the people who elected them. It is time to replace these members with honest people who can listen to the will of the people who elect them.
